What You Should Know Before Getting In Too Deep

If Someone is Planning To Dig On Your Property, Or You Are Doing The Excavation . . . Please Do Your Part

Look For:

- Pad Mounted Electric Transformers
- Utility Service Wires (Cables attached to the side of the utility pole and entering the ground.)
- Telephone Or Cable Television Pedestals
- Water Valves Or Hydrants
- Regulator Stations, Gas Meters, Valves or Test Stations
- Warning Signs Or Markers
- Manhole Rings and Covers

When you call, please have the following information available:

- Municipality – county, city or township
- Location – street address
- Nearest intersection of streets and roads
- Extent of work ■ Type of work
- Start date and time excavation is scheduled to begin
- Caller's name
- Excavator/contact person and phone number

Even When All Precaution Are Taken, Accidents Can Still Happen. If An Underground Facility Is Hit Or Even Scratched, Please Notify The Facility Operator.

Dig Safely. New York

- Call Before You Dig
- Wait The Required Time
- Confirm Utility Response
- Respect The Marks
- Dig With Care

BUILDING DEMOLITION/RENOVATION

Industrial Code Rule 56 established work practice, asbestos contractor license, and asbestos worker training and certification requirements that protect the public from cancer causing airborne asbestos fiber that can arise from various construction activities, including the demolition/renovation of a building. One very important aspect of the Code covers requirements that specifically address the potential public health hazards associated with the significant amount of airborne asbestos fiber that can be released during the demolition/renovation of a building that contains asbestos or asbestos-containing materials.

New York State Labor Law (Article 10, Section 241 section 241.10) and the Code require a survey of the impacted portion of the building to identify the presence of asbestos prior to advertising for bids or contracting for or commencing work on any demolition/renovation work on a building. **The Code requires that this survey must be sent to the local government unit responsible for issuing the demolition/renovation permit. Note that only copies of the demolition or pre-demolition survey must be sent to the Department of Labor, Asbestos Control Bureau.** Also, prior to commencement of demolition/renovation work, the impacted asbestos identified in the survey must be removed in compliance with the Code.

NOTICE TO BUILDING PERMIT APPLICANTS

An asbestos survey is required for all renovation, remodeling, repair and demolition of all interior and exterior building materials. As per NYS Industrial Code Rule 56, asbestos material must be abated by licensed contractors utilizing certified asbestos handlers, with the exception of owner-occupied single family homes, where the owner may remove the asbestos. However, it is not recommended that the owner remove asbestos. The owner could potentially expose themselves, their family and neighbors to asbestos fibers if correct engineering controls and work methods are not utilized during the abatement.
