August 6, 2021

For the month of August 2021, both the Marlboro and Milton Wastewater Treatment Plants complied with all the SPDES requirements. The following are monthly statistics for both plants;

Marlboro WWTP

- Average Daily Flow = **109,000** gallons per day.
 - (About 62% of design capacity.)
- Average BOD removal = **99%**
- Average Suspended Solids removal = **93%**

Milton WWTP

- Average Daily flow = **33,000** gallons per day.
 - (About 60% of design capacity)
- Average BOD removal = **99%**
- Average Suspended Solids removal = **99%**

Both the Marlboro and Milton treatment plants operated normally during the month of August without any major changes or events. We have completely finished working on the Marlboro Greenhouse roof. All the materials provided by Emcoplastics fit perfectly and will hopefully last another 30+ years. Having the roof finished will now allow us to make more use out of the greenhouse and ultimately save money on trucking out the sludge. We have also noticed that the aeration line at the Milton facility has become severely rusted and is in danger of failing. This airline is integral to the treatment process and should be addressed in the near future. I will contact Rapid Pump and Meter to see if this is something they could help with but I have a feeling it is too big of a job. Overall, both wastewater treatment plants are in good working order but are getting older. If you need any additional information, please do not hesitate to contact me.

Thank you,
Julian Falco
