

Town of Marlborough Conservation Advisory Committee  
Report to the Town Board  
August 26, 2024

To Supervisor Corcoran and Town Board Members:

We enjoyed our new meeting space at the Community Center and look forward to our next meeting there on Thursday, September 12 at 6:30 PM.

Member Naseem Haidaoui continues to represent us via his participation in the Ulster County Climate Smart Committee and in the Clean Energy Communities program. We will be participating in their upcoming September roundtable discussions.

We also discussed producing an event of some type to highlight the use of solar energy. In that regard, would you update us on the progress of the solar farm? We could schedule the event to support the opening of the solar farm and Nexamp marketing of the services to the community.

We had the opportunity to review the current situation in regards to the adoption of the Ridgeline Protection Law prior to the vote scheduled for this evening. Our thoughts are reported in an attached letter and included in this report for your minutes..

Respectfully submitted,  
Mici Simonofsky, Chair
