Hello Ryan,

We have been quit busy here we had a major brush fire on our mountain I apologize for the delay. The plans for dry hydrant look excellent we wish to have a 6" NH female swivel on the end. I will contact you tomorrow in case you have any other questions Thanx.

Good Morning Mike,

Please see the attached revised plans that identify the location of the dry hydrant and detail, (E/C501). We have also added the 20' min. dimension between the panels as the access drive terminates as discussed. Please let me know that you received this and if you have any further comments. If you would like to discuss anything, feel free to give me a call.
